SITUATION SUMMARY

Governor Brown Proclaims State of Emergency for Lake and Tehama Counties and Directs Assistance for Counties Affected

Governor Edmund G. Brown Jr. issued an emergency proclamation for Lake and Tehama Counties due to the effects of the series of rainstorms, high winds and flooding that caused extensive damage. Beginning on Nov. 30 of last year, the series of rainstorms impacted people and property by damaging private and public facilities and forced evacuations in some areas. The storms also caused damage in Alameda, Contra Costa, Marin, Mendocino, San Mateo, Ventura, Del Norte, Humboldt, Lake, Los Angeles, Monterey, Orange, San Francisco, Santa Clara, Shasta, Sonoma, Tehama, and Yolo. On Dec. 22, Gov. Brown also declared a State of Emergency in Marin, Mendocino, San Mateo, and Ventura Counties.

You can read the full text of the Proclamation [here](#)

Weather of Concern

- No significant Weather Watches or Warnings are in effect.

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

High pressure will build over Northwest California this week bringing dry conditions and a gradual warmup through this coming weekend. Low temperatures for the next couple of nights will fall into the 30s in several areas allowing for some frost to develop.

Medford Weather:

The next seven days are forecast to be quiet, dry, and mostly benign. There will be ridging over the West Coast for the next week, and although some shortwaves do attempt to ride up and over the ridge, none will have any impact on the weather in Southern Oregon and Northern California. The only discernible change in day-to-day weather will be steadily increasing temperatures through the weekend and into early next week.

Reno Weather:

Showers will diminish through the morning across the Western Nevada Basin and Range. A ridge of high pressure will begin to develop across the West Coast this week which will provide much drier conditions along with a warming trend into the weekend.

San Francisco Weather:

All shower activity over the district has now ended. Mostly clear skies, aside from some patchy night and morning fog, and a modest warming trend are expected for the remainder of the week as an upper level ridge of high pressure builds into the coast.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY

Sacramento Weather:

Drier and milder weather returns today and continues through the remainder of the week.

Hanford Weather:

Scattered rain and snow showers will be possible over the Sierra Nevada and Kern County Mountains this afternoon into the evening hours. Otherwise, high pressure will build over California resulting in a warming trend Wednesday into the weekend with dry weather.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

High pressure will move into the area today and kick off a period of clear weather with a warming trend that will last into the weekend. Afternoon maximum temperatures will be above normal later this week into the weekend.

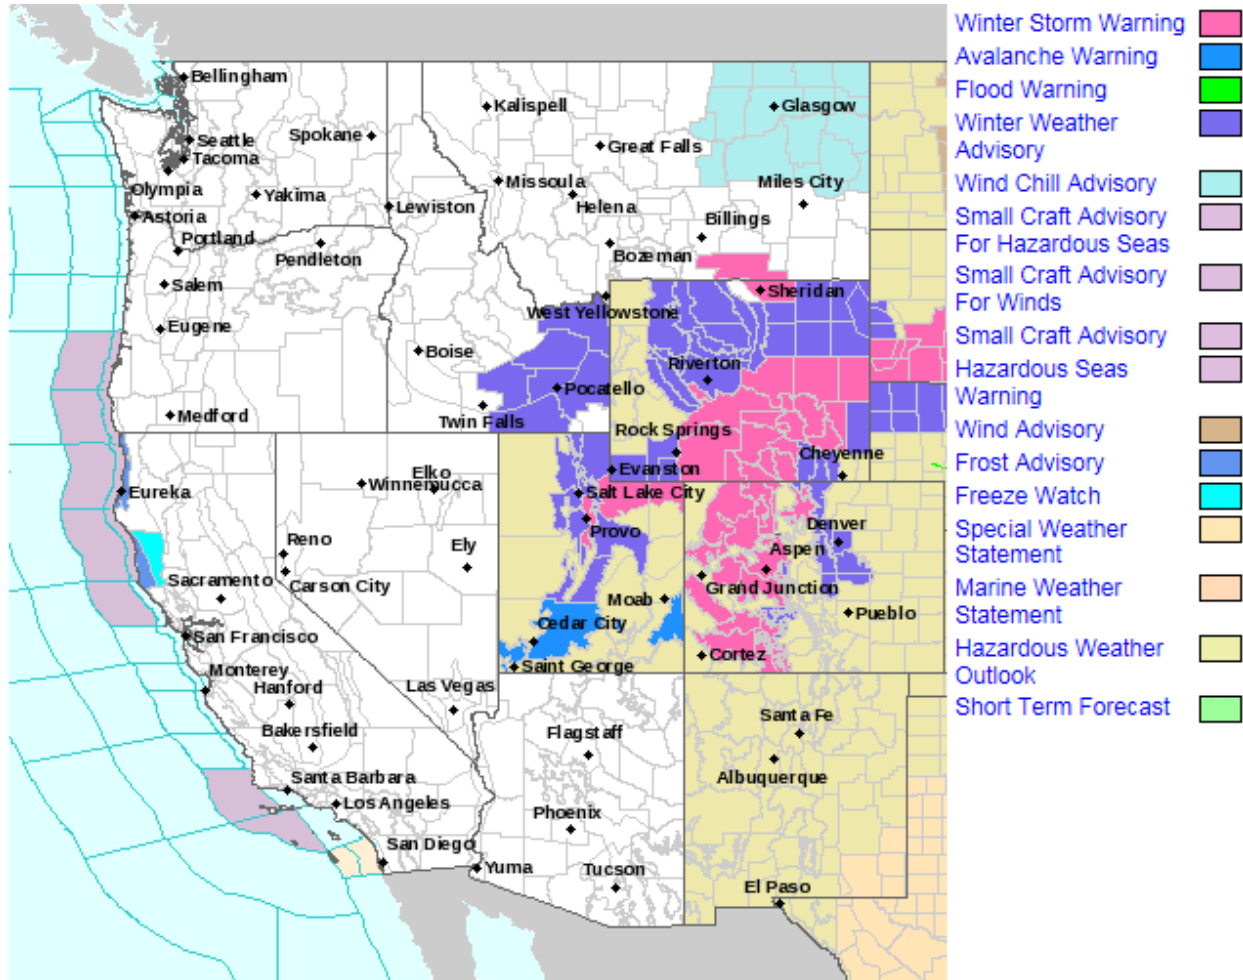

Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

A low pressure system moving southward off the Southern California and Northern Baja Coast will bring showers and isolated thunderstorms to the coastal waters this morning and a slight chance of showers to coastal areas. A weak trough of low pressure moving through Southern California this afternoon will bring a chance of showers to the mountains. Dry weather with a warming trend is forecast for Wednesday into the weekend under high pressure.

Southeast California Weather:

Low pressure that will be moving slowly southward across the region will keep the weather rather unsettled and cool through Wednesday. A return to above normal temperatures is likely Thursday into the weekend as a high pressure system builds over the Desert Southwest.

RECOVERY ACTIVITIES

Round Fire, Inyo and Mono Counties

- Recovery Individual Assistance continues to work with Mono County on the Initial Damage Estimate.
- The American Red Cross and Salvation Army continue to offer their support services.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC, Inland, Coastal, and Southern REOCs and the Santa Barbara County EOC are activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued an Executive Order on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought. Specifically, through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate a biweekly state interagency conference call regarding drought community impacts.
- Regional (Inland, Coastal, Southern) conference calls will occur once a month beginning 02/09/15.

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
